No bids will be accepted from any person who has not signed a registration form or a bidder sheet.
- 10) United States coins and currency will not, in conformity with law, be opened at less than face value.
- 11) No "buy" or "unlimited" bids will be accepted. We will act as agents for all mail bidders in the sale. Bidders not known to us are required to deposit 25% of their total bids in advance. Credit cards will not be accepted for auction purchases.
- 17) Title does not pass until payment in full is received. SMYTHE reserves the right to await clearance of any check before making delivery.
- 18) If a collection agency or attorney is required to collect outstanding accounts, all agency and court costs, witness and attorney fees and all other costs of any kind incurred by SMYTHE in procuring judgment shall be borne by the defendant. The signer of a SMYTHE bid sheet or participant in the auction concedes the jurisdiction of the courts of the U.S. in New York City or the New York State courts as SMYTHE alone shall elect. The participant in a SMYTHE auction also assumes both corporate and personal liability for unpaid auction bills.
- 19) SMYTHE may reopen the bidding on a lot under the following circumstances: 1) SMYTHE has failed to execute correctly a mail bid. 2) A party purchasing the lot on the floor has done so in error. 3) Where a protest is made after the hammer has fallen but before bidding has commenced on the next lot. 4) Where the auctioneer has determined that he has overlooked a party still bidding on the lot but before the calling of the next lot. 5) At the discretion of the auctioneer.
- 20) In the event of dispute, the auctioneer's decision is final.
- 21) New York State sales taxes or other state sales or use taxes shall be levied, as required by law. Dealers and other non residents are reminded that sales tax must be collected unless Form ST-128.1 has been filed properly, under regulations effective 1 December 1982.
- 22) No price adjustments will be made on the hammer price of a lot whether there is a complaint about the whole lot or only one item in it. The entire lot must be returned if a refund is to be made.

- 24) The same protections applicable to SMYTHE apply to each and every one of their officers and employees unless they shall be convicted of knowingly selling false or stolen goods.
- 25) SMYTHE assumes no liability for merchandise lost, stolen or damaged while in the possession of a party to whom merchandise has been shipped. The purchaser is solely responsible for the safe keeping and insurance of any items in their possession.
- 26) All accounts are payable to SMYTHE in U.S. funds and remittances must cover the service charges for foreign drafts which shall be added to each invoice.
- 27) All material in this catalogue is unconditionally guaranteed to be genuine.
- 28) No lots may be returned by floor bidders except for non-authenticity.
- 29) Mail bidders may return lots for reasons of non-authenticity or improper description within 5 days of receipt or thirty days from the auction's last day, whichever comes first. Failure to execute this privilege in a timely manner either from a failure to pay promptly or from any other cause shall void it.
- 30) In cases where a question has arisen as to the authenticity of an item, the purchaser must, before settlement day (30 days after the sale,) notify SMYTHE of his intention to return the item, confirmed in writing. The item will be examined by a recognized expert; if the item proves authentic, the sale will be consummated. If the item is not authentic, the sale price will be refunded.
- 31) The auctioneer reserves the right to postpone the sale by auction for a reasonable period of time as a result of any significant event which, in the sole discretion of the auctioneer, makes it advisable to postpone the event. No prospective bidder or prospective buyer shall have recourse as a result of any postponement.
- 32) The placing of a bid shall constitute **full acceptance of the foregoing terms and conditions of sale.**

The International Bond & Share Society (USA Chapter)

The Bond and Share Society was established in London in 1978 for the purpose of promoting the hobby of Scripophily - the collection and study of antique stock certificates and bonds. The American branch is the largest of the overseas branches, with over 200 members who receive the club's annual publications (2 issues of the Journal, 4 Newsletters and the Yearbook). The American branch also sponsors the study and publication of research on topics of purely American interest through its regional chapters. The society holds regular meetings in various locations.

With its affiliates, the Society has some 600 members in nearly 30 countries.

How To Get the Best Results When Bidding in a Mail Bid Sale

Bidding in mail bid auctions can sometimes be a real challenge, but mail bid auctions are real opportunities for collectors to acquire items that may be hard to obtain any other way. Experience has taught us ways to minimize frustrations, and maximize results, and we would like to share some of those ideas with you. Here are the questions we are asked most often and some of the suggestions we have made to bidders. We think they will save you time, money and help you win lots you might otherwise miss.

"I can't come to your office to view lots, but I want to know more about a particular lot before I bid on it."

Lots are available at the times and places posted in the front of the catalogue. We often bring lots to conventions, and there is no better way to learn about scripophily than to attend a convention, view auction lots, and talk to dealers and collectors. The Strasburg Show is the perfect place to do all three. We hope you will attend, but if you can't be there, here is how we can help you get a better idea of what you are bidding on:

- 1) **Call us, and we will be happy to have one of our experts describe any lot you ask about.**
- 2) **We can arrange to copy most items and we will FAX or mail the copies to you at a nominal charge.**
- 3) **If you have established credit with us we may be able to ship lots to you for direct viewing.**

Please realize that requests for phone assistance, for copies or for shipping lots directly to you **must be arranged well in advance of the closing date of the sale.**

"I have a limited budget and although there are many items I would like to bid on, I am afraid of exceeding my budget."

There is an easy way to solve this problem. It is called a **"limit" bid sheet**. Let's look at an example. Mr. Smith collects railroads and he sees that there are over fifty lots he would like to buy. His budget is \$1,000, but the estimates on the fifty lots he likes adds up to well over \$5,000. If he bids on all fifty he might win them all and exceed his budget. To be safe, he bids on only ten, and he wins only one lot for a \$100. Mr. Smith is disappointed because he missed the chance to bid on all fifty lots. **He could have bid safely on all fifty lots and increased his chances of improving his collection by submitting a "limit" bid sheet.** Here is how it works.

Mr. Jones has the same collecting interests as Mr. Smith. He has the same \$1,000 budget. Mr. Jones bids on **all fifty lots** he is interested in. He writes at the bottom of his bid sheet **"Please limit my total bids to \$1,000."** Every time Mr. Jones wins a lot we keep track of his total spending. When the total reaches \$1,000 we will stop applying his bids. We did what he would have done had he been at a live auction. We spent only what he budgeted for.

There is a special advantage to limit bidding in a mail bid sale - the bids can be listed in order of your preference. List the lots you want most first.

"I see that there are two similar lots in the sale. I want only one of them, not both of them."

This problem can be solved with an **"OR"** bid. Let's assume that Lot #101 and Lot #102 are identical. You wish to bid \$200 on either one, but you don't want both. Write the following on your bid sheet and you can accomplish your goal:

"#101 OR #102 at \$200"

If you win Lot #101 we will cancel your bid on #102.

"What if there are three similar lots and I only want one?"

"#101 OR #102 OR #103 at \$200" will work perfectly.

"When I don't win a lot I often seem to lose it by just a few dollars. It almost looks as if someone knows what I am bidding and they bid a little more. What is going on?"

Every auction house has its own way of closing a mail bid sale. Some houses will tell bidders exactly how much the highest bid is at any given moment right up until the end of the sale. We feel this is unfair, because anyone who is able to get through by phone near the end of the sale can top anyone else. If auctions are closed in this manner clients who are "friends of the house" have a distinct advantage and can top other bidders at the end. Those who bid early are at a disadvantage. To eliminate this problem **we don't give out information on what the highest bid is.** We advise bidders to bid exactly as much as they are willing to spend on a lot, and where possible, if they win a lot we reduce their bids to an increment just above the next highest bidder (there are exceptions - please see the Terms of Sale).

We think this method is fair to everyone involved, but it does result in bidders sometimes losing lots by \$1, or \$5 at times. If Mr. Jones bids \$100 on an item and Mr. Smith bids \$101, we have no choice but to award the lot to Mr. Smith for \$101.

"I bid \$30 on a lot that was estimated at \$100 and I didn't get the lot. Later, when I got the Prices Realized the lot was reported as unsold. Why didn't I get the lot?"

The Terms of Sale state that bids less than 50% of the estimate will not be accepted. As auctioneers, we have a responsibility to the consignors as well as the bidders. Any bid that is considered to be less than the "...regular market value..." of the item may be rejected by the auction house. Keep this in mind when making bids below the estimates given.

We hope these questions and answers have been helpful, and if you have any comments, suggestions, or further questions concerning R. M. Smythe auctions, please feel free to call us at 1-800-622-1880, or 212-943-1880.

Grading Terminology

Unlike coins and paper money, the grading of stocks and bonds has not developed to the point where everyone agrees on or uses similar standards. The very nature of stocks and bonds defies a grading system based, for example, on wear, or folds.

Instead of trying to develop a strict grading system, we have used terminology designed to convey a strictly subjective impression of the items we endeavor to describe.

Fair - A certificate with extreme handling, fold splitting, stains, small pieces or tears.

Fine - Slightly below average. Folds may be heavy with splits slightly into the design elements, but with no pieces missing. More severe flaws will be mentioned.

Very Fine (VF) - The average grade of most of the stocks and bonds we encounter. A **Very Fine** share certificate will have several light to moderate folds, and the paper will show obvious wear or softness. Bonds that were originally folded by the printer may have several additional folds. There may be minor edge roughness, but any splits that extend into the designs will be described. Very light soiling is typical, but heavier stains or foxing will be mentioned.

Very Fine+ (VF+) - Obviously used or worn, but brighter or cleaner than the average example.

Extremely Fine (EF) - A well above average example. Stocks may show a few light to moderate folds. Bonds that were originally folded may have a few light to moderate extra folds. The paper will retain most of the original crispness and brightness. The margins will be free from noticeable edge splits, stains or other problems.

Extremely Fine+ (EF+) - As made, or nearly so.

All certificates are **Very Fine** unless otherwise mentioned.

The North American Land Company was established by Robert Morris, John Nicholson and James Greenleaf. Its land holdings, as the name indicates, were scattered over American, with four million acres, half in Georgia and the residue scattered among the Carolinas and New York. Fortunately, most of the company's Georgia properties were in what is now Georgia itself, and so avoided any connection with the Yazoo land frauds or Fletcher vs. Peck (1810), which was the first occasion that a state law was struck down as unconstitutional. This was important because Chief Justice Marshall, who wrote the decision, would have had to recuse himself if his brother and the North American Land Company had been involved. What Are "Proofs"?

The highest quality stocks and bonds were printed from engraved steel or copper plates. A proof is a sample impression on very soft paper ("India paper"), usually mounted on card stock. Because the paper is very soft and the plate is newly-engraved, every line is clearly and sharply transferred. The first impressions on special paper were never utilized as monetary instruments. Proofs were used by the engravers to check the accuracy of the work as it progressed. The final proofs were sent to the clients for approval. The printing run began only when the final proof, initialed by the client, was returned to the banknote company. Early progress proofs (pre-1860's) are rarely encountered. Often, only the final approval proof was filed away in the banknote company's archives. The fragile nature of the India paper and the large format of most certificates resulted in real storage problems. Large proofs had to be folded to fit into standard file drawers, and over time, many certificate proofs were lost or destroyed. Plate cancellation proofs also exist. These represent the final impression, taken before the plate was destroyed. Easily distinguished from first impression proofs, the cancellation proofs are usually printed directly on to card stock and are usually clearly identified by rubber stamp impressions.

What Are SPECIMENS?

When bank note companies print stocks or bonds for their customers they often print a few additional copies for various purposes. Some are kept in the bank note companies reference files. Others are sent to the customers who use them as counterfeit detectors. These extra copies usually have the word "SPECIMEN" printed into the signature blocks and they have "00000" serial numbers so that they cannot be mis-represented as regularly issued stocks or bonds. While SPECIMENS lack the signatures of the corporate officials, they are usually in pristine condition, and often they are the only way to obtain an example of a particular stock and bond.

Jacob Simon Herzig was born in New York in 1871. At the age of 19 he was sent to prison for larceny and later ended up in Sing Sing for forgery.
